

Welcome to Jim's celebration of life (via zoom). We are all saddened that we lost Jim so soon and even more upset that we cannot celebrate his life in person together; so I figured that we could share our memories of Jim in this way. Jim was born on April 1, 1949 and we lost him way too soon on Dec. 28, 2021 at the age of 72.

Jim started at BNL on June 14, 1999 after a career at Grumman. He retired from BNL on August 31, 2015. Jim and his wife Colleen were married for many years until her untimely passing in February of last year. Although we are saddened by the loss – I know he is reunited with his beloved Colleen and all their adored pets.

He immediately joined the PeopleSoft Development Team and helped out with various PeopleSoft modules – including: Inventory, Scanners and Shipping Memos. Jim was extremely smart and always willing to help out his co-workers in any way possible.

He was active with various Ski Trips and BERA trips with Colleen.

He also created our Shamrock Run. Many of the runners would get together and run the morning of the Christmas Eve Holiday. Shamrock would join the runners and when Shamrock passed – Clover took over those duties. He would be always willing to supply the "special" OJ for the runners. ☺. We will miss Jim and Colleen dearly and hold all the good memories close to our heart.
